iWave™ - C

Residential
Air Cleaner
Up to 6 Tons

iWave™ - R

Mini-Splits
PTAC's,
VRF's

iWave™ - F

How iWave Works

iWave is an air purifying device that installs in any duct air conditioning system. When air passes over the iWave, ions produced by the device reduce pathogens, allergens, particles, smoke and odors in the air, creating a health environment without producing any harmful byproducts.

iWave Advantage

You'll find iWave's advanced technology provides the most effective air purification method. Other common air purification technologies require ongoing maintenance with bulb/cell replacement every year or two, making the cost of ownership undesirable.

iWave air purifiers have no harmful byproducts, and most models require no ongoing maintenance and have no replacement parts. In fact, with the iWave-R's patent-pending self-cleaning design, you can enjoy years of maintenance-free performance.
